Professional Summary

Full Stack Developer with 4 years of experience designing, developing, and deploying scalable fintech and enterprise SaaS applications serving 90,000+ users. Expertise in JavaScript, TypeScript, React.js, Node.js, Express.js, and PostgreSQL across the full Software Development Life Cycle (SDLC). Proven track record in CI/CD automation with Jenkins, Docker, and Playwright, eliminating 5+ hours of manual testing per release cycle. AWS Certified Cloud Practitioner with strong skills in RESTful API development, microservices, third-party integrations, OAuth 2.0, JWT authentication, and Agile/Scrum delivery.

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, SQL, PL/SQL, C++, HTML5, CSS3
- **Frontend Development:** React.js, React 19, Redux, Styled-components, Webpack, Responsive Web Design
- **Backend Development:** Node.js, Express.js, RESTful APIs, Microservices, JWT Authentication, OAuth 2.0, OpenID Connect, Role-Based Access Control (RBAC)
- **Databases:** PostgreSQL, MongoDB, Redis, Sequelize ORM
- **Cloud and DevOps:** AWS (EC2, S3, Elastic IP, IAM), Docker, Jenkins, GitHub Actions, Nginx, CI/CD Pipelines, Git, GitHub
- **Testing:** Jest, React Testing Library, Enzyme, Cypress, Playwright, Unit Testing, Integration Testing, End-to-End Testing (E2E)
- **Tools and Platforms:** Postman, Jira, Splunk, PagerDuty, BullMQ, Linux, Unix Shell
- **Methodologies:** Agile, Scrum, SDLC, Test-Driven Development (TDD), Object-Oriented Programming (OOP), Data Structures, Algorithms, Code Reviews
- **APIs and Integrations:** Google Sheets API v4, Google Drive API v3, OAuth 2.0, Third-Party SSO, iframe Messaging

Professional Experience

Cognizant Technology Solutions - Software Engineer | Gurugram

June 2024 - Present

- Develop and maintain a React-based plugin for an enterprise accounting platform that enables 90,000+ users to import business data (Customers, Vendors, Items, Chart of Accounts) from Google Sheets, CSV, and Excel files across 40+ locales.
- Integrate Google APIs (Sheets v4, Drive v3, OAuth 2.0) using a custom abstraction layer for bearer token authentication, data transformation (JSON to CSV, binary to Blob), and runtime validation enforcing a 1,000-row limit.
- Build a third-party payroll integration plugin with OpenID Connect SSO, cross-domain iframe messaging, and 20+ payroll and tax report configurations tailored for UK region enterprise customers.

- Design and develop secure RESTful APIs using Node.js, Express.js, JWT authentication, Role-Based Access Control (RBAC), and PostgreSQL for a large-scale enterprise SaaS product.
- Author comprehensive unit tests using Jest, Enzyme, and React Testing Library, and end-to-end tests using Cypress and Playwright, increasing code reliability and reducing production defects.
- Deliver bug fixes, performance optimizations, and reusable utility libraries across frontend and backend codebases in an Agile/Scrum environment with daily stand-ups, sprint planning, and peer code reviews.

Cognizant Technology Solutions - Junior Software Engineer | Gurugram

Dec 2023 - June 2024

- Automated CI/CD pipelines using Jenkins and Docker, integrating Playwright for end-to-end testing and eliminating 5+ hours of manual testing per release cycle.
- Configured PagerDuty alerting and Slack notifications for Jenkins pipeline failures, reducing incident response time and improving deployment reliability.
- Developed and maintained automated UI test suites using Playwright for React-based frontend applications, increasing test coverage and reducing regression defects.
- Delivered bug fixes and minor feature enhancements across React frontend codebases in an Agile development environment.

Cognizant Technology Solutions - Programmer Analyst Trainee | Gurugram

Dec 2022 - Dec 2023

- Authored UI test cases using Playwright across multiple web applications, covering end-to-end user flows and edge cases.
- Built automated test scripts for React frontend components, improving test coverage and reducing regression defects in production releases.

Cognizant Technology Solutions - Intern | Gurugram

Oct 2022 - Dec 2022

- Built a Student Marks Management System with report card generation using SQL and PL/SQL for database operations.
- Gained hands-on experience with C++ programming and Unix shell commands through instructor-led projects.

Projects

- **[Portfolio Website \(www.shubnit.com\)](http://www.shubnit.com):**
 - Built a full-stack personal website with vanilla JavaScript, HTML/CSS frontend and a shared Express.js backend API.
 - Implemented JWT authentication, AWS S3 file storage, MongoDB Atlas database, contact form with Mailtrap email integration, and Google Drive API for resume downloads.
 - Deployed via GitHub Actions CI/CD to AWS EC2 with dark/light theme toggle and rate limiting.
- **[Blog Website \(blog.shubnit.com\)](http://blog.shubnit.com):**
 - Built a full-stack blogging platform with React 19, powered by the shared Express.js backend APIs built for the Portfolio Website.
 - Integrated Editor.js rich text editor with image uploads, custom HTML parsers, and XSS prevention.
 - Automated deployment via GitHub Actions CI/CD with multi-stage builds to AWS EC2 using self-hosted runners.
- **[Self-Hosted Cloud Storage \(drive.shubnit.com\)](http://drive.shubnit.com):**

- Built a self-hosted file storage server with direct upload for 100MB and chunked uploads support up to 100GB per file, multi-user access with JWT + 2FA, shareable links with expiry and password protection, deduplication, and activity logs.
- Implemented background job processing with Redis + BullMQ for automatic thumbnail generation (FFmpeg, Sharp, libheif) and file cleanup via cron jobs.
- Configured Nginx reverse proxy, DDNS, PostgreSQL (Sequelize), GitHub Actions CI/CD, and DNS routing - all set up from scratch.
